

Travis White

Front-End Software Engineer

My goal is to work with a team of like-minded, forward-thinking people, with the goal of truly making an impactful product. The best fit would be a remote, agile, continuous delivery team that values honesty, its people, and its purpose above all else.

🎓 EDUCATION

Eastern Illinois University

Graphic Design (BFA) & Studio Art Minor / 2013 - 2018

- Developed strong skills in art and design that directly translated to success in my work with clients and employers post-graduation.
- Lead a group of fellow art students to create a yearly magazine called Blueroom Magazine that is designed, published, and sold by students.

✍️ EXPERIENCE

Graphic Designer @ Gavina Graphics

January 2019 - July 2020

- Responsible for designing original art and branding elements for individual clients and client teams.
- Collaborated as a team to problem solve technical print production problems in an industry that is focused on quality and quantity.
- Built design formulas that increased productivity and consistency for my design work.

Freelance Front-End Software Engineer

Working as a contractor and a general freelancer / 2017 - Present

- Write robust and functional code that meets the needs of the client.
- Produce designs that support the vision of the client yet, provide an intrinsic value from a designer's eye.
- A grateful experience to have a chance to work with clients that value my input as a software engineer and designer who understands the importance of compromise while delivering a product that supports the client's vision. I'm happy to be working with large companies like Tri-County Welding, and individual artists such as Peter Chao, Brooke Winka, and Ainscough Studio.

📌 PROJECTS

Tri-County Welding

tricountywelding.com / HTML, CSS, jQuery / 2017 - 2021

- Professional site for Tri-County Welding, a well known and respected fabrication company that supplies structural steel for schools, hotels, and more.
- I worked closely with their team to design and build a site that was responsive, user-friendly, and reflected their history as a company.

Travis White Portfolio

traviwhite.com / Next.js, Sass, Contentful, Framer-Motion / 2021

- A fun personal site with the intended purpose of hosting all the projects and general creative work.
- Built using Next.js and animated with Framer-Motion.
